Graphic Designing

Graphic design is a craft where ShubhiTech creates visual content to communicate messages by applying visual hierarchy and page layout techniques, the designers of ShubhiTech use typography and pictures to meet user's specific needs and focus on the logic of displaying elements in interactive designs, to optimize the user experience.

Cloud Hosting

Consulting and Maintenance

There are several cloud companies like AWS, Microsoft, Google, IBM etc., and each of them has thousands of products/services to design your server. ShubhiTech team brings years of experience in cloud deployments to help you select the most cost-effective and efficient solution tailored to your needs.

Our expert team can help you to design your best server architectures, which will give you the best performance and security with minimum cost. Additionally, ShubhiTech offers its cloud platform, SNOVAR, which provides cutting-edge performance and security.

We Work With

Software Prototyping

Software prototyping is the activity of creating prototypes of software applications, i.e., incomplete versions of the software program being developed. ShubhiTech prototype is a simulation of how the actual project will look, work, and feel and would not have an exact logic involved in the software development phase.

ERP – Management Systems

Enterprise resource planning (ERP) is a platform companies use to manage and integrate the essential parts of their businesses. Many ERP software applications are critical to companies because they help them implement resource planning by integrating all the processes needed to run their companies with a single system.

Explore the ERP Services

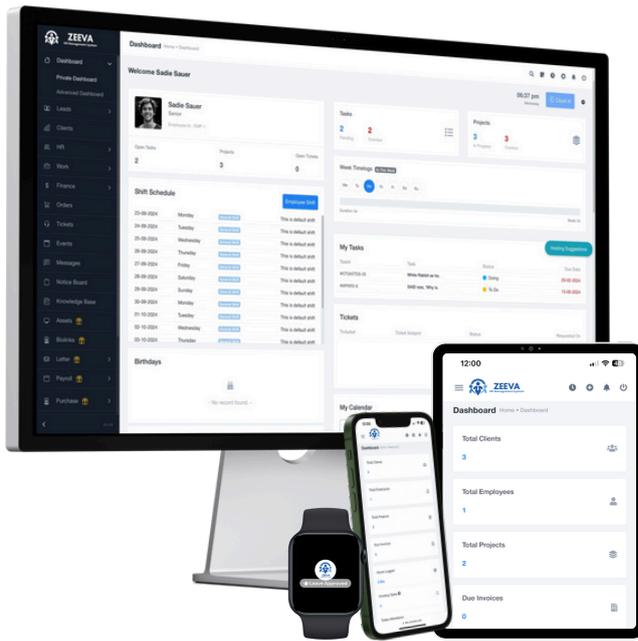

- **ZEEVA** (HR Management System): Streamlined platform for managing human resources efficiently, including payroll, employee records, performance evaluations, and recruitment processes.
- **GNOSIS** (Hospital Management System): Comprehensive solution designed for hospitals and healthcare facilities to manage patient records, appointments, medical billing, inventory, and staff scheduling.
- **SPITIVERSE** (School Management System): Tailored system for educational institutions to automate student enrollment, attendance tracking, grading, curriculum management, and communication with parents.
- **CAPACIOUS** (Hotel Management System): Robust software for hotels and hospitality businesses to handle reservations, guest check-ins/outs, housekeeping, billing, inventory management, and reporting.

ZEEVA HR: Human Resources Software

Zeeva helps in managing all of their Human Resource Management functions efficiently without errors. Hence, it increases the overall efficiency and productivity of your business. Zeeva also enables easy and secure access to the employee database, thereby reducing the time and effort required to manage it efficiently.

ZEEVA is a software application used to store employee information and support various human resource functions, such as benefits, attendance, payroll, recruiting, training, etc.

GNOSIS: Hospital Management ERP

Gnosis is a simple-to-use Electronic Medical Record & Practice Management ERP Software by ShubhiTech (opc) Private Limited. It is a Browser based app deployed provides cloud-based software solutions designed for any Hospital that provides Accessible, On Time, and Patient-Centric Care with managed Workflow and Reminders.

Gnosis can be used in any Hospital, Clinic, Diagnostics, Pharmacy, laboratory, Medical Practitioner, and end-consumers for maintaining patient details, doctor reports, test results, and more. It Integrates the entire Resources of a Hospital into a Customized ERP Software Application.

SPITIVERSE: SCHOOL ERP SOFTWARE

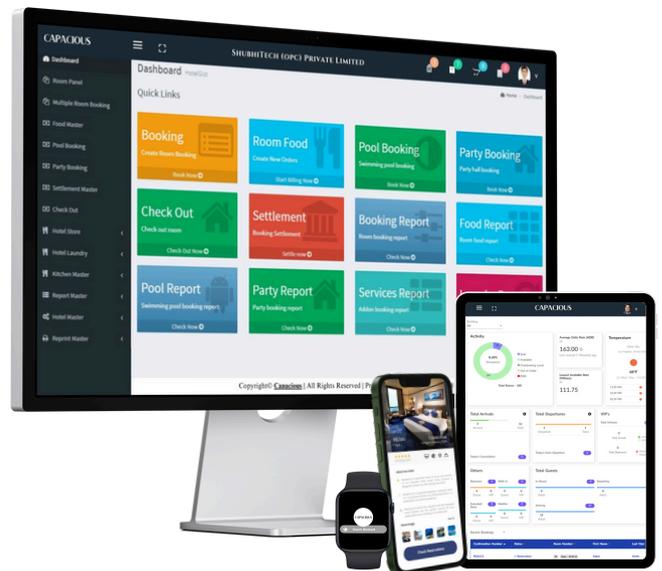

Spitiverse, a School Management System is a comprehensive list of all the administrative tools required to digitize a school or University.

ShubhiTech presents Spitiverse which will have a school ERP to assist with the administrative tasks at school or university.

Running a school is a challenging task and involves several layers of control and paperwork. Outsourcing all the administrative processes to the school management software can relieve the staff to focus on student-centric learning, soft skill training, and several other life skill training sessions.

CAPACIOUS: HOTEL MANAGEMENT ERP

In this era of rapid technological advancements, Capacious stands out for its forward-thinking approach. The software adapts to the evolving needs of the hospitality industry, incorporating innovations such as mobile accessibility, keyless entry systems, and integrated Point of Sale (POS) functionalities.

Capacious Hotel Management Software, a comprehensive solution designed to transform the way hotels manage their day-to-day activities. As the name suggests, Capacious is not merely a software but a capacious reservoir of features and functionalities aimed at streamlining hotel processes, enhancing guest experiences, and ultimately elevating the standards of hospitality excellence.

BUSINESS PROCESS MANAGEMENT

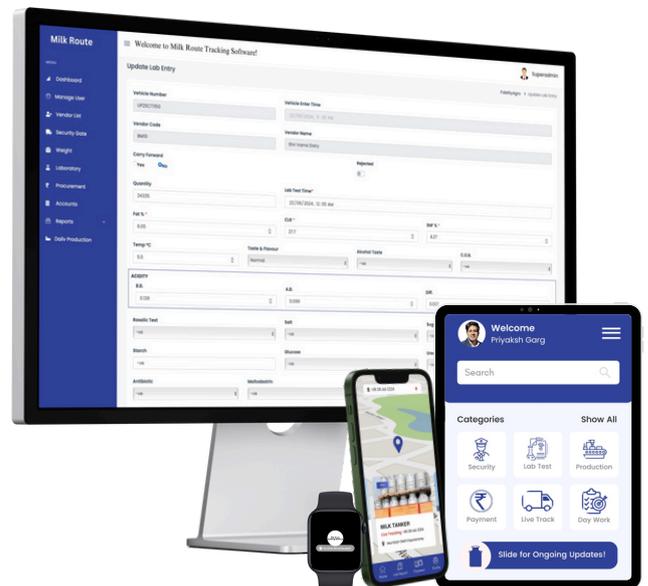

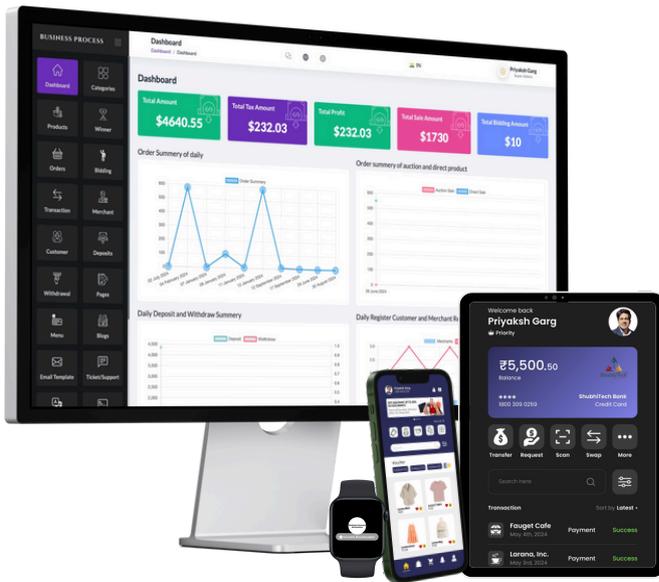

ShubhiTech introduces a comprehensive Business Process Management (BPM) software solution that offers a full suite of tools that optimize workflows, enhance productivity, and improve overall operational efficiency, enabling organizations to digitize their core business functions seamlessly.

Managing a business involves multiple layers of operations, decision-making, and paperwork. Outsourcing all the administrative processes to a Business Process Management (BPM) software can allow teams to focus on core business activities, innovation, and growth strategies.

MILK ROUTE & LOGISTICS

ShubhiTech's Milk Route software stands out with its innovative approach. The software adapts to the evolving needs of the dairy industry, incorporating features like mobile accessibility, route optimization, real-time tracking, and integrated inventory management to streamline milk distribution and delivery processes.

From route optimization and real-time tracking of deliveries to automated inventory management and billing systems, Milk Route ensures seamless coordination across the supply chain. Its advanced functionalities help enhance operational efficiency, reduce costs, and improve customer satisfaction, ultimately raising the standard of dairy management and service excellence.

- Private Blockchain Development
- dApps Development
- Custom Blockchain App Development

PROJECT REMINISCENCE THE POWER OF MEMORIES

ShubhiTech's Project Reminiscence aims to transform the treatment of Alzheimer's and depression by leveraging the power of holographic technology. The project creates personalized, immersive holograms that help patients relive significant moments from their past, triggering emotional and cognitive responses that enhance memory recall, reduce anxiety, and promote emotional well-being.

This cutting-edge approach combines advanced holographic visuals with AI-driven therapy to offer patients an interactive experience where they can revisit familiar environments, loved ones, or cherished memories. These holograms are designed to stimulate brain activity, foster mental engagement, and aid in the treatment of neurodegenerative conditions like Alzheimer's. Additionally, patients suffering from depression can benefit from these experiences by revisiting uplifting moments, which help in alleviating symptoms of despair and emotional isolation.
